Wirechat Beta

Chats

Wirechat allows you to create private 1-on-1 chats, manage settings from the panel, send messages, and perform actions such as deleting or clearing chats.

Creating Chats

To allow users to create new chats, enable the action in your Wirechat panel:

```php
use Wirechat\Wirechat\Panel;

public function panel(Panel $panel): Panel
{
    return $panel
        //...
        ->createChatAction();
}
```

> *"Note: If disabled, users won't see the option to create new chats in the UI."*

- Create Using the WireChat UI
    1. Click the Plus icon in the chat list.
    2. Search for and select a user to start a conversation with. Customize Search.
    3. Click on the user's name to initiate a chat.
- Creating a Private Chat Programmatically

With another user:

```php
$otherUser = User::first();
$auth = auth()->user();
$conversation = $auth->createConversationWith($otherUser, 'Optional message');
```

With yourself:

```php
$auth = auth()->user();
$conversation = $auth->createConversationWith($auth, 'Optional message');
```
